OVERVIEW

Frontend Developer and UI Designer with hands-on full-stack experience gained through personal and side projects. Strong background in building responsive, user-focused interfaces using React, Next.js, TypeScript, and Tailwind CSS, with practical experience developing backend APIs, databases, and deployments using Node.js, MySQL, and AWS. Invovled in developing e-commerce, blockchain, betting, back-office, and scheduling systems, and actively expanding end-to-end engineering skills.
